EXPERIENCE

Lead QA Engineer

Mosaik 01/2024 - Present Remote
https://www.mosaik.io/

- Led the QA efforts for multiple product lines, focusing on property management solutions and real estate applications.
- Developed and executed detailed test plans and cases for web and mobile applications to ensure all features meet quality standards.
- Performed end-to-end testing including functionality, usability, API integration, and performance across various modules.
- Collaborated closely with development teams to identify and resolve bugs, ensuring a seamless user experience.
- Implemented automation testing strategies to streamline regression testing and reduce the time-to-market for new features.
- Actively participated in Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives to ensure smooth project delivery.

Senior QA Engineer

W1tty Remote,UK
https://www.w1tty.com/

- Managing and testing functionalities related to beneficiaries management, money transfers, and bill payments.
- Overseeing the SumSub portal for user approval and rejection processes, ensuring seamless selfie and passport verification.
- Conducting thorough verification of user flows for UK, UKNR, and EU regions.
- Performing extensive API testing, back-end testing, functional testing, and GUI testing to ensure robust and reliable banking solutions.

Senior QA Engineer

AION Digital Remote, Bahrain
https://aiondigital.com/

- Managed card issuance, processing, and various digital banking activities, including financial transactions via IBAN and bank account numbers.
- Conducted manual functional testing, API testing, load testing, and GUI testing on mobile and web applications.
- Performed SIT & UAT for ongoing projects and ensured quality across the Bank RM (Relationship Management), COB (Client Onboarding), and POB (Post Onboarding for UAM) portals.
- Utilized DAON for selfie verification, DOCU Sign for signature verification, and integrated with CORE BANK (AZENTIO) and AML (KIYA) systems.
- Contributed to major projects such as KFH (Kuwait Finance House) and Vision Bank.

Lead Software QA Engineer

Retailo technologies Lahore,PK
https://retailo.co/

- Oversaw the entire B2B-Commerce and Q-Commerce app lifecycle, from ideation to feature delivery.
- Led a team of 4-5 colleagues, conducting API, database, GUI, core functionality, regression, and sanity testing.
- Responsible for end-to-end testing of mobile apps (Android and iOS) and web portals.
- Ensured post-production verification and 24/7 system uptime.
- Worked on major features such as FinTech BNPL (Buy Now Pay Later), EasyPaiza integration, and HyperPay.
- Managed life-cycle testing of orders, including consumer order placement and logistics integration, and tested Web Admin and StockPortal for warehousing activities.

Senior QA Engineer

Jeeny Lahore,PK
https://www.jeeny.me/en/

- Managed testing for ride-hailing and delivery platforms across mobile and web applications.
- Conducted API, database, GUI, core functionality, regression, and sanity testing with a focus on driver/passenger modules, delivery logistics, and Google Maps integration.
- Key involvement in FinTech integrations including ApplePay and HyperPay, and testing of Jeeny's new website.
- Ensured quality throughout the life-cycle of ride and order processes, from reservation to delivery.
- Spearheaded Web Admin portals testing for administrative tasks and implemented automation initiatives.

SUMMARY

Detail-oriented Lead QA Engineer with over 9 years of extensive experience in ensuring the quality and functionality of diverse digital products and platforms. Proven expertise in digital banking, fintech, proptech, gaming, e-commerce, and ride-hailing industries. Skilled in API testing, back-end testing, GUI testing, and automation. Experienced in leading QA teams, managing end-to-end testing processes, and collaborating closely with development and product teams to deliver high-quality software solutions. Proficient in a wide range of tools including JIRA, TestRail, Postman, and various automation frameworks. Strong advocate for maintaining 24/7 system uptime and ensuring seamless user experiences.
